

Switchvox® Feature Comparison

Switchvox is Digium's family of VoIP Phone systems for small and medium businesses.

Switchvox systems are designed to be easy to use, full of helpful features and cost less than a traditional PBX.

Switchvox SMB

Switchvox SMB is a complete business phone system designed for small to medium-sized businesses seeking a full feature set and powerful functionality. This means you can say goodbye to the monolithic PBX of the past. Now you can have the freedom to grow from a single office to a global network without breaking the bank. And because Switchvox systems are compatible with today's high speed data networks and traditional telephony infrastructure, you can change at your own pace.

Switchvox SOHO

Ideal for demanding small offices or home offices that need a professional phone system, Switchvox SOHO has an easy web interface, so there's no need to worry about the details that make traditional phone systems so complicated. We know that the smaller you are, the faster things change, and the last thing you need is to worry about the technology that's supposed to be making things easier. Switchvox SOHO delivers an incredible set of features to even the smallest offices, even when you're out of the office.

Switchvox Free

Switchvox Free is the pared-down version of Switchvox's award-winning, Asterisk-based, IP-PBX. If you've thought about replacing your current PBX with something better, we think you should give Switchvox Free Edition a try. It's a great way for businesses to get started with a full-featured phone system that's easy to configure and manage.
